---

No trout, No water,. Could not believe my eyes. Water was so low, way to warm. They have had no rain in over a month. I saw one trout in 3 days....unhealthy trout fishery. to many rockbass, smallmouth and chubs....Tons of huge sucker fish as well....hopefully things get better for this place in the Spring:

If you want cold good flowing water in the dog days of summer come and try the north branch, you'll soon forget about shavers fork.
